

BUILDING READERS®

How Families Can Help Children Become Better Readers

Danville Elementary School

Play the Alphabet Words game with your child to review phonics and spelling

Alphabet Words is a fun game that helps kids practice their letters, spelling and word sounds.

To play:

- 1. Create a playing board.** Draw a line down the center of a sheet of paper. Write letters A through M down the left side, and N through Z down the right.
- 2. Write down a word** that starts with each letter of the alphabet. For example, *announcement* for A, *beautiful* for B, etc.
- 3. Encourage your child to think** of as many words as she can. Give hints if she needs them.
- 4. Write the words** next to each of the letters.

For an extra challenge, make all the words of a game match a theme—such as animals or foods.

“Reading is a basic tool in the living of a good life.”

—Mortimer Adler

Familiarize your child with analogies

Students have to read analogy problems on some standardized tests. The problems often follow a formula: “A is to B as C is to D.” For example, “*Sock* is to *foot* as *glove* is to *hand*.” (The relationship between A and B is similar to the relationship between C and D.)

See if your child can solve problems like these:

- **Hot is to cold** as *top* is to _____. (*Bottom*—because the words are opposites.)
- **Sun is to yellow** as *grass* is to _____. (*Green*—because the words are descriptive.)
- **Grape is to fruit** as *carrot* is to _____. (*Vegetable*—because the words are in categories.)

Research supports reading with family

Research shows that children who read at home with parents do better in school.

It helps when you:

- **Keep** reading materials handy, such as magazines, books and newspapers.
- **Talk** about books.
- **Tell** pretend and real-life stories.
- **Point out** words everywhere you go.
- **Set** a good example by reading daily.

Make reading a special activity

Reading at home should be special and personal for your child. Help her establish a cozy and comfortable spot to read. And encourage her to read whatever she likes!

Concentration can help your child remember important sight words

Review *sight words* by playing

Concentration. These are words that your child should know just by quickly glancing at them. Ask your child’s teacher for a list of sight words. Then:

- 1. Have your child write** each word on two index cards.
- 2. Lay out the cards** face-down.
- 3. Take turns flipping over** two cards at a time. If the cards are the same, remove that pair. If they are different, flip the cards back over.

Interesting discussions build comprehension

To help your child get the most out of books, talk about them before, during and after she reads. Discuss a book's:

- **Title and the summary on the back cover.** What can your child tell just from looking at the cover? What does your child think will happen? Why? Where does the story take place? Is there a conflict in it?
- **Characters and plot.** What are the main characters like? Does your child agree with their decisions? What might happen next?
- **Conclusion.** Did the story end the way your child expected? What other endings can she imagine? What did she get out of the story?

Venn diagrams help with organizing

Venn diagrams are a kind of *graphic organizer*, a visual tool that helps students organize and structure their thoughts.

If your child is comparing and contrasting, try using a Venn diagram. Have him:

1. **Draw two overlapping circles.**
2. **List similarities** where the circles overlap.
3. **List differences** on the far right and left of each circle.

For lower elementary readers:

- ***Bear Has a Story to Tell*** by Philip C. Stead (Roaring Brook). Bear looks for his friends to tell them a great story, but they're all preparing for winter. Maybe he'll be able to tell his story in the spring.

- ***Dinosaurs!*** by Gail Gibbons (Holiday House). In this colorful, informative book, young paleontologists will learn about different kinds of dinosaurs, from what they ate to how they looked.

For upper elementary readers:

- ***Heroes and She-ros: Poems of Amazing and Everyday Heroes*** by J. Patrick Lewis (Dial). From Helen Keller to Roberto Clemente, this book of poetry describes how numerous people have made the world a better place.
- ***Racing the Moon*** by Alan Armstrong (Random House). Alexis is building a rocket to go into space. Then she meets Captain Ebbs, a space travel expert, and the space pioneers set out on adventures.

Encourage your child to start a book club

If your child likes to tell you all about the books he's reading in school, encourage him to start a book club with his friends. Book clubs are a great opportunity for children to read for pleasure and discuss what they're reading.

When they form a book club, your child and his friends will be able to:

- **Choose books** that interest them.
- **Meet with other kids** who want to read.
- **Gather regularly** to discuss reading.
- **Have relaxed conversations** about the material.
- **Lead the discussion** by themselves, without an adult's help.
- **Be independent** by developing discussion questions on their own.
- **Choose new books** to discuss.

Q: My child procrastinates about doing homework, and I think it's because reading intimidates her. Could this be the case?

A: If reading is hard for your child, homework probably is, too. But don't let her avoid it. Expect her to stick to a study time—such as every day before dinner. Always provide supervision and support. Ask her teacher about how to build her reading skills.
