

WELCOME BACK!!

Things to know about Transportation 2020-2021

Dear Parents and Students,

This year is a challenging year but we can all work together to help our students have a safe experience.

- All students are required to wear a face mask while riding the school bus. Drivers will wear a mask only when loading or disembarking students at the school. Wearing a mask while driving may impede their vision.
- Students will be assigned a seat by the driver.
- There is limited capacity on the bus. Only 23 – 30 students who must sit one per seat and no one behind the driver. Siblings may sit together.
- **FIRST VIEW APP:** You will be able to sign up and track the bus. Please look for this information listed on the transportation page. It will tell you how to download the app and sign up! Please be patient at school start up as it takes time for updates to be entered.
- Use Web Query link on school or district web page to find bus stop information. Follow directions on how to enter your address. Check this Web Query frequently as changes will be noted as we become aware of them.
- Most buses will have high school students riding with middle school students.
- If you have bus changes for your student enter them in PickUp Patrol or notify your school office who will then notify Transportation Coordinator.

It is a pleasure to serve our students. If you have any questions or concerns please contact Transportation Coordinator at 382-6119 Ext 2229
