

Dear Timberlane Parents and Guardians,

Tomorrow will begin the first day of remote learning for our school community. Our staff members have diligently planned and created lessons that will continue our students' learning. Although the learning will be delivered in a different manner, we will retain our expectations for rigorous and relevant learning experiences for all students. We would like to extend our deepest gratitude to our staff members who have worked tirelessly to transition our learning practices from the classroom to a remote model.

Your child's teacher(s) will communicate all week 1 assignments, along with expectations and submission guidelines, by 9:00 am on Wednesday, March 16, via parent email for students in Preschool-Grade 5 and via Google Classroom for all TRMS and TRHS students. Moving forward, weekly assignments will be communicated by 4:00 PM each Monday.

Please feel free to contact your child's teachers with any questions regarding instruction, assignments, or assessments. For all other communications regarding general school business, please contact the building principals via email.

We encourage all parents and guardians to regularly check email and the district websites for updates as we move deeper into this school shutdown. Please refer to our district website for updates on Covid-19 Information, as well as numerous online learning resources: <http://www.timberlane.net/covid19-students/>. This link is also located on the front page of every school website under the Covid-19 Information icon.

Please be advised that all school buildings, including the central office will remain closed during this period. We will take this opportunity for buildings to undergo an intense sanitation and disinfecting (deep cleaning) process. It is important that we keep everyone out of the schools and central office, even after the cleanings, to help keep them uncontaminated for the safe return of our staff and students when the time comes.

We thank you for your tremendous support and understanding of the complexity of this unprecedented situation.

Timberlane Regional School District
